

*Discreet & invisible
platform lifts*

Aesthetic and space-saving solutions that blend with the surroundings

Improving the accessibility at especially older and heritage buildings can often present a challenge. We manufacture many different kinds of platform lifts that combine dignified entrance for people with impaired mobility with nice architecture. In this way everyone will be able to use the same entrance and do so with dignity instead of being directed to the back entrance.

Our bespoke platform lifts are perfect in new and heritage buildings that require discreet and aesthetic solutions, as they are customised in every detail to accommodate the needs and wishes of the client. With the right construction and adaptation we can make the platform lifts almost invisible.

LP50 & LP50H ***– the perfect solution for the near-invisible platform lifts***

The LP50 and LP50H platform lifts are mounted into the floor and by using the building's floor material, the platform lifts melt into the surroundings, and thus become a beautiful solution for both new and heritage buildings.

Model B ***– recessed outdoor platform lift with hidden railings***

When the lifting height exceeds 500 mm, the height of the railing must be 1100 mm. The high railing can be a challenge when creating discreet access solutions. Therefore, we have designed the model B so that the platform lift including the high railing is integrated into a prefabricated pit in the ground, which makes the platform lift less visible when not in use.

Model C
 – platform lift
 integrated in the stairway

The model C is designed for installation in a flight of stairs and functions both as a platform lift and as stairs. By using the same tiles on the steps the platform lift is nicely integrated into the stairway.

Model E
 – stairs converted
 into a platform lift

On the model E the stairs are converted into a platform. When activating the control button the platform's safety barriers go up and the stairway automatically changes to a platform. Hereafter, the platform lift is ready for use and can be operated by using the up and down buttons.

Stepless™

by Guldmann

Stepless is a part of V. Guldmann A/S, which has more than 30 years of experience in developing assistive technology products for disabled persons, designed to improve their quality of life.

Under the Stepless brand we sell accessibility – accessibility that gives the walking-impaired, wheelchair users and others on wheels access to their surroundings.

- Platform lifts
- Bespoke platform lifts
- Wheelchair ramps
- Wheelchair access to the public transport industry
